

We are looking to strengthen our team at our location in Glanegg/Carinthia with immediate effect for a self-reliant and committed

BACK-End Developer with focus on RUST m/f/d

Your tasks

- Design and implement efficient, scalable server-side solutions in Rust
- Work closely with cross-functional teams to develop and implement software solutions
- Identify and resolve errors in server-side operations and ensure system stability
- Develop and maintain APIs and web services to ensure optimal integration of front-end and back-end components
- Active participation in code reviews to ensure quality and standardization of software
- Continuous education and acquisition of new technologies and programming languages to stay on the cutting edge of backend development

Your profile

- Bachelor's degree or higher (computer science, software engineering, or a related field)
- Strong programming skills (preferably in Rust) and experience in backend development
- Confident with Git and version control best practices
- Familiarity with database systems and SQL (especially time series data)
- Interest in data warehousing, service setup and monitoring, authentication services, and machine integration concepts
- Excellent problem solving skills and attention to detail
- Strong communication, abstraction, and teamwork skills to coordinate with other developers
- Good command of the English and German languages, both written and spoken
- Independent and structured way of working
- First work experience desirable, but not required

Your perspectives

- A highly interesting field of activity, with long-term employment and performance-oriented remuneration
- Opportunities for professional development and career advancement
- Support for continued education and training programs
- Independent and, above all, challenging work
- Flexible working arrangements
- Collaborative and inclusive work culture that values diversity and promotes teamwork
- Access to modern office facilities and equipment
