

To strengthen our team at the Glanegg/Carinthia site, we are looking for an independent and committed specialist for

Application Engineering (m/f/d)

EPS Industry

Your Responsibilities:

- Development and optimisation of application procedures for EPS products and consideration of the latest technologies and market requirements
- Technical support and advice for internal teams and external partners regarding the processing and application of our EPS products
- Participation in European bodies and committees as well as national interest groups on the subject of plastics/EPS
- Conduct testing and analysis of product quality and performance, including documentation and reporting of results
- Product development and innovation, including implementation of sustainable material concepts
- Organization and management of training activities for customers and internal employees to promote technical understanding and application competence

Your profile:

- Completed studies in a relevant technical field (e.g. materials engineering, process engineering, chemical engineering)
- Professional experience in application engineering, ideally in the EPS industry or related fields
- Strong analytical skills and the ability to communicate complex technical contexts in an understandable way
- High motivation and passion for sustainability and innovation
- Excellent ability to work in a team as well as independent and goal-oriented way of working
- Good command of written and spoken English

Your Perspectives:

- An exciting position in an innovative and future-oriented company
- The opportunity to actively participate in the design of sustainable and innovative solutions
- A dynamic work environment that fosters your personal and professional development
- A competitive salary package and attractive benefits

-The salary of the position is based on one year's salary EUR 70,000. Depending on qualifications and experience, an overpayment in line with the market is offered.
