

Join our team as

Quality assurance technician

(m/f/d)

Your tasks:

- Development and implementation of quality assurance strategies to ensure compliance with the highest quality standards in production
- Carrying out quality inspections, internal audits and preparing meaningful reports and analyses
- Identifying quality deviations and developing sustainable solutions for continuous process and product improvement
- Working closely with the engineering team on product developments and optimisations
- Training and sensitising employees with regard to quality-relevant processes and standards
- Contributing to the creation of technical drawings and models

Your profile:

- Completed technical high school (HTL - mechanical engineering, civil engineering) or a comparable specialisation
- Several years of professional experience in quality assurance, preferably in a manufacturing company
- Sound knowledge of quality assurance procedures and standards as well as experience in dealing with common quality management systems
- Strong analytical skills, a structured way of working and a high level of problem-solving expertise
- Strong communication skills, ability to work in a team and a high degree of initiative

Your perspectives:

- An innovative and highly interesting area of responsibility in a promising industry with long-term employment
- Opportunities for professional development
- Promotion and support for further training measures
- Flexible working hours for a good work-life balance
- Independent and autonomous work in a team
- A cooperative and inclusive work culture that values diversity and promotes teamwork

Are you ready for the next step in your career? Become part of our future-orientated team and shape the future with us! We look forward to receiving your application.
