

We are looking to strengthen our team at the Glanegg/Carinthia site with immediate effect for a responsible and committed

## Quality Assurance Technician (m/f/d)

### Your tasks:

- Development and implementation of quality assurance strategies and procedures to ensure the highest quality standards in production
- Carrying out quality inspections and audits and preparing reports and analyses
- Identifying quality issues and developing solutions to continuously improve processes and products
- Working closely with the engineering team on product development and improvement
- Training employees in quality assurance procedures and standards
- Support in the creation of technical drawings and models
- tasks, contributing to the success of the company.

### Your profile:

- Completed training in quality management, ideally with a focus on quality assurance or comparable qualification
- Several years of professional experience in the field of quality assurance, preferably in the manufacturing industry
- Sound knowledge of quality assurance procedures and standards as well as experience with quality management systems
- Analytical mindset and problem-solving skills
- Strong communication skills and ability to work in a team

### Your perspectives:

- An innovative and highly interesting field of work in a future-oriented industry with long-term employment
- Targeted further training opportunities
- Independent and responsible work within a team
- Supportive and motivated team
- Development opportunities in one of the most innovative and dynamic companies in the industry

The remuneration for the position starts at a minimum annual salary of EUR 50,000. Depending on qualifications and experience, market-compliant overpayment is offered.
