

Join our team as

Mechanical Design Engineer

(m/f/d)

Your tasks:

- Development and design of new products – from the initial concept to series production readiness
- Creation of detailed and assembly drawings, including bills of materials
- Preparation of circuit diagrams (P&ID, hydraulic and pneumatic schematics)
- Close collaboration with the electrical engineering and production departments
- Preparation of technical documentation and manuals, as well as participation in conformity procedures (CE)
- Technical coordination with suppliers and external partners

Your profile:

- Completed technical education (University, University of Applied Sciences, Technical College) in mechanical engineering or a related field
- Proficient in CAD systems (e.g. Siemens NX, SolidWorks, AutoCAD) and common IT applications (MS Office)
- SAP knowledge is an advantage
- Basic knowledge of machinery directives
- Strong technical understanding and interdisciplinary thinking
- Team-oriented, resilient, and flexible personality
- Good command of English, both written and spoken
- Independent, structured, and solution-oriented working style

Your perspectives:

- A varied and responsible role with long-term career prospects
- Comprehensive product, technical, and specialist training
- Targeted further education and development opportunities
- A motivated, supportive team and a positive working atmosphere
- An open and innovative idea culture in one of the most dynamic companies in the industry
- Attractive opportunities for personal and professional growth

For this position, we offer an annual gross salary starting at EUR 45,000 (based on a 38.5-hour work week).

A higher salary is possible depending on qualifications and experience.
